

Safety and Control Through Technology

Graphidis 100i

Application

Hook Levelling System

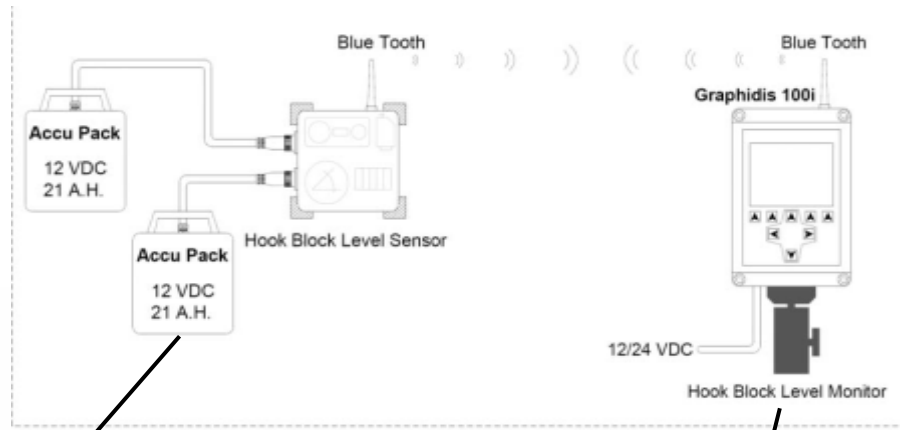

Hook levelling system

The PKS-graphidis hook leveling system informs the driver of the actual angle between the two hook blocks.

Advantages

Equal loading of the hook and winches
 Safe lifting large materials with two cranes

Optional

- Data logging (additional unit).
- Extendable to 8 sensors like a load axle
- Warning outputs
- Warnings on screen

Graphidis

User friendly platform extendable on every customer wish
